Introduction

Hello and welcome to this special report.

So, you say you want to get rich and pay off your debts. Right? In this special report you are going to learn three secrets that will put you in a path to wealth and freedom.

We will discuss how having a clear cut vision of what you want will help you to become rich. And also discuss the necessary ingredients that you need to make your dream a reality.

Getting rich is much like baking a cake. If you want to bake a cake you must have necessary ingredients. Try baking a cake without all the ingredients; you won't end up with a cake. In fact, you will end up with a big mess in your hand.

Finally, I will show you a simple method you can use to eliminate your debts and live a care free life. There is no use working only to pay off your debts. Your career or business must be something you do for fulfillment.

So, that being said, let's start...

Best of success,

Humphrey Khoana.

Know What You Want

The first thing if you really want to get rich is to think about the things that you want. Have a clear vision of what you want most.

No dream is too small or big. Just focus on what you really want.

And once you received the things you desired most, then you will go on to other things that make for a really rich life. This will make you mentally strong and confident in your undertakings.

People who are confident get promotions, customers, better opportunities with less effort than those who are not. And they also have lasting relationships. Remember this.

How much money will you want to have? How would you live if you have the amount of money you want? And when do you expect to achieve your dream?

If your beliefs and feelings are not in harmony with the things you want it will be difficult to attain them.

Do you have anti-wealth beliefs? Beliefs like:

“God wants me to be poor in order to serve Him.”

“I will never have enough money, I earn little income.”

“Only some people can get rich fast because they are lucky and I am not.”

....And many things like those?

If you have anti-wealth beliefs just assess them to see if they serve you. Do they make you any good? If not, why do you keep on holding onto them? You can invalidate them by learning the laws that govern the acquisition of riches.

Time For Action

What are you going to do to get the money that you want?

Now that you know what you want you must think of ways of how you are going to get it.

How are you going to earn money enough to buy the things that you want? Or are you just going to sit and hope for something to happen.

Discover how you could make a very quick 100 bucks or up to **\$1,000.00 a day** or more without a job, without a business, and **without any hassle!** Click Here: <http://bit.ly/cAJZjf>

Let me tell you something important about getting rich. Sitting and doing nothing to change your circumstances will not do you any good. Before you know it, there will be nothing where you are.

So be good to yourself. What ideas you can think of that will make you more money?

May be you could offer your services as a consultant. Perhaps, you can start your own business, or whatever you can do now that will not require much learning before you can earn income.

You are also welcome to try something new if that is what you want.

If you can see yourself offering people your services now to earn the money you want then you will succeed. How does it feel to offer people services or products they want in return for the money you need?

There is Power that will never fail to hand you money making ideas if you begin with the end in mind.

“I tell you, you can pray for anything, and if you believe that you’ve received it, it will be yours. ”, taught Jesus.

Think about what you can do to earn the money you want. It might take sometime to come up with a good idea. For some people it can take a day, others a weeks, still other a month.

When it happens that an idea just pops into your mind to make money implement it as soon as you can. Act on those feeling of inspirations, intuitions, hunches that occur to you immediately.

Trust this method. It works.

If you really desire something it will stay in your mind day and night, and you will not need to force it with any visualizations.

Plan To Act Now

Make simple plans to act on your ideas. Every successful person knows that planning is important. Planning allows you to execute your ideas efficiently.

In my book, [Phenomenal Secrets To Get Rich Now](#), I reveal in detail how to make simple plans that are achievable. I found that making plans very simple and achievable produces fast results in terms of financial rewards.

Do not be paralyzed by inaction, hoping something good will happen. Nothing comes without deliberate effort.

Act with the purpose of getting what you want.

I always tell people that they need to have skills in doing the work that will make them successful. Apply your knowledge in the Right Way to get rich.

Persist

If you fail for the first time never give up. Look for help from those who succeeded in your field of interests. Anyone who has amassed fortune quickly knows that.

Assess why you failed. And come up with better ways to do the work that will make you rich.

Eliminate Debt

Debt trapped many people from leaving their dreams. Ninety five percent of the population work in the jobs they hate only to have money to pay their unending debts. Many relationships are ended because of debts.

I remember the day I quit my boring job like as it was yesterday. One of the reasons I had the confidence to quit was that I eliminated most of the debts that were sucking my pay check dry. Then, I pursuit my dream of being a successful entrepreneur and investor without worrying about not being able to pay bills.

If you have debts you really need to come up with an effective plan to eliminate them. In fact, debt is something not to be proud of.

You can eliminate you debts one by one. Debts are the most sources of trouble in many families as they eat away the whole household income.

People who are worried about bills are unproductive. To get rich, for them, becomes speculation because getting rich requires performance. And you cannot perform to the best of your abilities if you are worried about money.

Sit down and take out a pen, paper and calculator, start writing down all the debts you have. Begin by paying off the small debt. Once finished, tackle the next smallest debt.

And depending on your situation, inform your creditors about your intentions. You can make arrangements with them to restructure your payments in order to allow you to finish the small debts fast.

Most of your creditors will agree to your idea. And you must also assure them that you'll pay all your debts including the interests. You must stick to your promise.

You will do well to cut off some unnecessary spending. If you subscribed to some newspapers or magazines that do not help you to achieve your

dreams is time to cancel your subscriptions.

With this extra money in hand you can pay yourself more and hammer your debts. Or even take some extra courses that will help you to develop your career.

If you do, you will increase your market value and earning power. You can even start your own business, invest, or get whatever you want that contributes to wealth, beauty and power.

It is easy to get out of debt. And there are many ways to do it. Be disciplined to implement your debt management plan. I also discuss this topic further in [Phenomenal Secrets To Get Rich Now](#).

Ask for professional help if you need it.
